PROFILE SUMMARY

Web Developer with hands-on experience in Laravel, PHP, WordPress, and Professional SEO. Skilled in developing and maintaining web applications and eCommerce websites, managing products, fixing technical issues, and improving website performance and search visibility. Strong understanding of computer hardware and PC components, with a practical, detail-oriented approach to modern web development.

WORK EXPERIENCE

Freelancer Web Developer 2024 - Present

- As a freelance Web Developer, I have developed and maintained a variety of websites and web systems using WordPress, PHP, Laravel, and Laravel with Vue.js. My work includes creating e-commerce websites, brand information sites, and custom web-based systems such as inventory and booking management. I specialize in managing product catalogs, updating product details (images, specifications, and prices), and ensuring smooth functionality for tech-related products including laptops, PC parts, and accessories like motherboards, processors, RAM, SSDs, and graphics cards. I also implement basic SEO and optimize product listings to enhance search performance and user experience. Throughout my projects, I work closely with clients to deliver reliable, responsive, and user-friendly websites that support business growth.

SEO Specialist (Freelance) 2025 January - Present

- As a freelance SEO Specialist, I help websites improve their search engine visibility and drive more organic traffic. I conduct keyword research, optimize on-page elements, and implement technical SEO best practices to enhance site performance. My work includes improving website speed, fixing errors, optimizing product pages, and ensuring a better user experience. I also provide guidance on content strategy, meta tags, and product optimization to help websites rank higher on search engines. I collaborate closely with clients to align SEO strategies with their business goals and achieve measurable results.
